Vinay P Bhavi
Intern LRDE, DRDO
Bengaluru

Dear Hiring team,

I am writing to express my interest in opportunities in the RF, microwave, and antenna design domain. I am currently in my final year of Electronics and Communication Engineering at Sai Vidya Institute of Technology, and my work has been consistently focused on antenna design, simulation, and RF systems.

Over the past year, I have worked extensively with ANSYS HFSS, FEKO, and MATLAB on sub-6 GHz and 5G antenna designs. One of my key projects involved designing a microstrip patch antenna with a Crescent DGS, where I improved S_{11} from -7 dB to -32 dB while also achieving better gain. I have also designed a 4×4 phased array antenna with beam steering at 3.5 GHz, achieving an S_{11} of -22.5 dB and a gain of 6.87 dB. In addition to RF work, I built an IoT-based solar tracking system that improved energy efficiency by around 15%, which helped me develop a more practical, system-level approach to engineering problems.

Alongside my technical work, I have been actively involved in IEEE activities, technical presentations, and research. I have presented at MAPCON and have a paper accepted for publication in IEEE Xplore. These experiences have helped me communicate technical ideas clearly and work effectively in team environments.

I am currently pursuing an internship at LRDE, DRDO, where I am gaining exposure to real-world RF and radar systems. I am looking for an opportunity where I can apply my skills in antenna design and RF systems while continuing to learn in a challenging environment.

I would be glad to discuss how I can contribute to your team. I can be reached at 7204258592 or via email at vinaypbhavi.22ec@saividya.ac.in. Thank you for your time, and I look forward to hearing from you.

Sincerely,

Vinay P Bhavi
