Career Objective

Aspiring RF and Antenna Design Engineer with strong expertise in Electronics, RF, Microwave, and Wireless Communication Systems, specializing in antenna design, simulation, optimization, and validation using ANSYS HFSS, FEKO and MATLAB. Hands-on experience in Sub-6 GHz and 5G antenna simulations and performance analysis. Actively engaged in IEEE research, technical documentation, competitive engineering projects and leadership activities.

Education

Sai Vidya Institute of Technology, <i>Bachelor of Engineering</i> , GPA: 9.09	2026
Jnana Jyothi PU College, <i>Pre University (PUC)</i> , GPA: 92.83%	2022
Jnana Jyothi High School, <i>SSLC</i> , GPA: 94.4%	2020

Experience and Internship

Pursuing Internship at LRDE, DRDO	Jan 2026 – July 2026
One-month Virtual Internship by WAMS	May 2025 – June 2025

Projects

RaNaT: Towards Cleaner and Brighter India

- Engineered a IoT-based solar tracking system, focused on sustainability and cost effectiveness with real-time monitoring.
- Achieved a 15% increase in energy storage efficiency while focusing on small-scale renewable applications.

High-Performance Sub-6 GHz Patch Antenna with Crescent DGS for 5G Applications

- HFSS designed microstrip patch antenna with DGS operating at 3.5GHz, resulting in a good impedance matching.
- Obtained results, S11 of -7dB without DGS and -32dB with DGS, achieved gain improvement from 3.7dB and 4.06dB, respectively.

Design and Simulation of Phased array antenna with beam steering for Sub 6GHz Applications (Accepted for WAMS 2026)

- Designed 4x4 phased array with beam steering for Sub 6GHz applications at 3.5GHz compatible for 5G applications.
- Achieved S11 of -22.5dB and gain of 6.87dB on high loss substrate FR4 and performed effective beam-steering in desired direction.

A Compact Uni-Spine Slot-Loaded Patch Antenna for C-Band Wireless and UAV Communication Systems (Accepted for SCPGCON 2026)

- Designed a Uni-Spine slot loaded patch antenna for C band applications on RT5880 suitable for PCB technology.
- Achieved S11 of -35dB and VSWR standing close to unity measuring 6.82dB of gain suitable for C band applications.

Skills and Abilities

- Software:** HFSS, MATLAB, MS Office, LabVIEW, Arduino, FEKO
- Embedded & Programming:** Python, C
- RF, Microwave & Antenna:** RF, Microwave, Antenna, Antenna design, Communication, Validation, Fabrication
- Core Competency:** Leadership, Project Management

Key Achievements and Roles

- “BEST OUTGOING STUDENT 2026 – ECE”**, awarded BOS 2026 from dept. of ECE at SVIT.
- Winner:** INVENTRONICS Hackathon conducted by Dept. of ECE, SVIT
- Presenter:** MAPCON 2024, SRISHTI EVENT and IMTEX 2025, demonstrating strong research and presentation skills.
- Secretary & Chair:** IEEE SVIT SBC(STB11371) & IEEE CEDA, CASS, SPS, EMBS SVIT SBC
- Collaboration:** INTERNATIONAL MICROWAVE WORLD LEADER’S CONCLAVE (IMWLC) 2025 | IEEE FNWF 2025 | INDICON 2025 | Organizing Committee – PROTECH SUMMIT 2026 | IEEE CONECCT 2026

Certifications

- MATLAB onramp
- Microstrip Patch Antenna Array in Ansys HFSS
- MATLAB Wireless Communications Onramp
- RF Basic Concepts & Components Radio Frequency
- Simulation of Dipole array in HFSS
